Education

Undergraduate BS(Hons) in
Cyber Security

**Sri Lanka Institute of Information
Technology**

G.C.E A/L

Sri Naga National School

Skills

- Programming: Python, Java, C, JavaScript
- Web Technologies: HTML, CSS
- Cybersecurity: Ethical Hacking, Penetration Testing, Vulnerability Assessment, Network Security
- Tools & Technologies: Wireshark, Nmap, Git, Linux, VS Code
- Soft Skills: Problem Solving, Teamwork, Communication, Analytical Thinking

About Me

Cybersecurity undergraduate with a strong interest in ethical hacking, penetration testing, and secure system development. Hands-on experience in building vulnerability scanners, network-based applications, and security-focused tools. Passionate about identifying vulnerabilities and developing practical solutions to enhance system and data security.

PROJECTS

Secure TCP Client-Server System

Technologies: C, Socket Programming, Linux

- Developed a secure TCP client-server application
- Implemented authentication and basic encryption mechanisms
- Supported multiple client connections using process handling

T-Chat (Real-Time Chat Application)

Technologies: Java, Networking, Socket Programming

- Developed a real-time messaging application using client-server architecture
- Implemented communication over network sockets
- Demonstrated strong understanding of networking concepts and protocols

Web Vulnerability Scanner

Technologies: Python, Web Security, HTTP Requests

- Developed a scanner to detect common web vulnerabilities
- Identified insecure endpoints and input validation flaws
- Simulated real-world attack vectors

Phishing URL Detection System

Technologies: Python, Scikit-learn, Pandas, Flask

- Built a machine learning model to classify URLs as phishing or legitimate
- Performed feature extraction on URL structures
- Improved detection accuracy using classification algorithms

CERTIFICATIONS

- AI/ML Engineer – Stage 1 | SLIIT (2025)
- Introduction to Programming using Python | HackerRank (2026)
- Java Programming | Great Learning (2024)
- Generative AI | Great Learning (2024)
- Introduction to Cybersecurity | Cisco (2026)

Advanced Vulnerability Scanner

Technologies: Python, Networking, Security Testing

- Developed an automated tool to scan systems and websites for vulnerabilities
- Identified open ports and misconfigurations
- Improved efficiency in penetration testing tasks

EXTRA-CURRICULAR ACTIVITIES

- founder of RootRecon Cybersecurity Platform
- Active learner in ethical hacking and cybersecurity research
- Engaged in cybersecurity content creation and awareness
- Cybersecurity Blogging & Knowledge Sharing
